

Environmental Markets and Biogas: Valuing Climate Benefits

Peter Weisberg

June 12, 2013

Indianapolis, IN

EPA 2013 AgStar National Conference

Climate Benefits of a 2,000 cow, 750 kw Dairy Digester

Environmental Markets and Biogas

1. Carbon Markets
2. Low Carbon Fuel Standard Credits
3. Renewable Identification Numbers (RINs)

Environmental Markets for Biogas

| Market | Credit | Biogas Use | Geographic Limitation |
|-------------------------------------|---------------------------------------|---------------------|-----------------------------|
| California Cap-and-Trade | Offset | Any | Anywhere in the US |
| California Low Carbon Fuel Standard | LCFS Credit | Transportation fuel | Fuel consumed in California |
| US Renewable Fuel Standard | RIN (Renewable Identification Number) | Transportation fuel | Anywhere in the US |

California Carbon Market Key Insights

- Buyers = Large emitters in California
- Offset Project Types:
 - Livestock manure
 - (Post-consumer food waste = voluntary, not yet accepted by California)
- Sunset: 2020

**Offsets generated and
owned by the digester**

Offset Value

=

**Offset Quantity x Carbon Price
– Transaction Costs**

Offset Quantity

- Estimation:
 - 2.5 – 4 offsets/cow
- Quantification – Model methane emissions
 - Temperature
 - Historic manure management
 - Project design

Carbon Price (\$/mtCO₂e)

Allowance Price

California Certified Offset

Voluntary Offset

Transaction Costs

- Monitoring and Reporting
- Verification - \$10,000/year
- Account fee - \$500/year
- Registration fee - ~\$0.23/credit
- Commercialization

California Carbon Market Uncertainty

- Long-term contracts require “regulatory out”

| | 2013 | 2016 |
|------------------|----------------------|----------------------------|
| Feb. `13 Auction | \$13.62 100% sold | \$10.71 46% sold |
| May `13 Auction | \$14.00 100% sold | \$10.71 79% sold |

Low Carbon Fuel Standard Key Insights

- Biogas must be consumed as transportation fuel in California
 - Out of state: “Physical Pathway”
- Buyer = Transportation fuel refiners and importers in California
- Sunset: 2020
 - (2020 target applies until legislation is modified)

Low Carbon Fuel Standard Credits

LCFS credits generated and owned by the digester.

***Must report data from fueling station**

$$\begin{aligned} &\text{LCFS Value} \\ &= \\ &\text{LCFS Credits x LCFS Price} \\ &\quad - \text{Transaction Costs} \end{aligned}$$

LCFS Credit Quantification for dairy digesters

- 2013:
 - ~0.0892 LCFS credits/MMBTU
- 2020
 - ~0.0798 LCFS credits/MMBTU

California 2013 LCFS Price (\$/mtCO₂e)

California LCFS Credit Prices

January 2013 – June 2013

| | \$/mtCO₂e | \$/MMBTU¹ | \$/DGE¹ (diesel gallon equivalent) |
|---------|-----------------------------|-----------------------------|---|
| Low | \$22.50 | \$2.01 | \$0.26 |
| Average | \$39.03 | \$3.49 | \$0.45 |
| High | \$57.25 | \$5.12 | \$0.66 |
| | | | |
| Current | \$57.25 | \$5.12 | \$0.66 |

¹ \$/MMBTU and \$/DGE prices for 2013; credits generated per MMBTU or DGE vary annually as the CA LCFS carbon intensity target is adjusted down.

Low Carbon Fuel Standard Uncertainty

- Commerce clause violation
 - US District Court – Unconstitutional
 - Ninth Circuit – Stay of preliminary injunction

LCFS vs RIN Revenue

| | \$/MMBTU | \$/DGE (diesel gallon equivalent) |
|---------------------------------|-----------------|---|
| LCFS Current Price ¹ | \$5.12 | \$0.66 |
| RIN Current Price | \$13.77 | \$1.78 |

¹ \$/MMBTU and \$/DGE prices for 2013; credits generated per MMBTU or DGE vary annual as the CA LCFS carbon intensity target is adjusted down.

Thank you!

Renewable Identification Numbers Key Insights

- Buyer: Transportation fuel refiners and importers
- Project types: Biogas from
 - Dairies
 - Waste water treatment plants
 - Landfills
 - (“Waste digesters” under proposed new rules)
- Sunset: 2022

RINs and the Renewable Fuel Standard 2

**RINs generated and owned
by the fueling station**

Advanced Biodiesel RIN Prices

May 2012 – June 2013

| | \$/RIN | \$/MMBTU | \$/DGE (diesel gallon equivalent) |
|---------|---------------|-----------------|---|
| Low | \$0.29 | \$3.77 | \$0.49 |
| Average | \$0.564 | \$7.33 | \$0.95 |
| High | \$1.08 | \$14.03 | \$1.82 |
| | | | |
| Current | \$1.06 | \$13.77 | \$1.78 |

Henry Hub Natural Gas Price:

\$2.99/MMBTU

RIN Market Uncertainty

- Volatility
 - Brazilian sugar cane ethanol = Advanced Biodiesel RIN
- Annual adjustment of required RIN retirement
